For the various Fuji Xerox DocuPrint P105... P455, Phaser 3010 and 4010 as well as WorkCenter 3045 laserprinter Xerox has developed a new print-engine for higher resolution and a new toner (EA-Toner) that works with a lower fusing-temperature for lower energy consumption of these devices at printing speeds up to 45 ppm and a crispy resolution of 1200 x 1200 dpi.

The same engine and toner are also used in the EPSON M300... 1400, LP-S340 and S440 laserprinter as well as in NEC MW-5300, 5400 which leads to a relatively large number of installed printers using toner cartridges that contain and can be remanufactured with our new Premium compatible toner.

Substantially lower printing-cost without compromising on performance or image-quality are the result and make this premium compatible bulk-toner (made in Japan) an interesting opportunity for professional distributors and recyclers.
