Print/copy speeds of 60ppm, respectively 70ppm in color as well as copy/copy speeds of 65ppm, respectively 75ppm in mono-chrome at 600dpi resolution with 256 greyscales and warm-up time of 60 seconds only are just a few of the remarkable features these Multifunctional color devices are offering.

Printing-cost of these colour machines however can be significantly reduced without compromising on image-quality or performance by using CROSS Imaging-Supplies' Premium Quality compatible toner (engineered in Japan) which is also compatible with the equivalent NRG, Lanier and Savin machines.
